

ianwebstertx@gmail.com

512-466-1980

Austin, TX

## Technical Skills

- Programming Proficiencies: Java, JavaScript/TypeScript, React, Node.js, C++, C#, Python, SwiftUI, SQL, AWS, LangChain, FastAPI
- 3D/Design Tools: Blender, Maya, Figma, Adobe Photoshop, Illustrator, Lightroom, TouchDesigner
- XR Development: Unreal Engine 5, Unity Game Engine, Rokoko Studio

## Education

08/2024

**Southern Methodist University**

Dallas, TX

**Bachelor of Arts:**

Computer Science, *Lyle School of Engineering*

Creative Computing, *Meadows School of the Arts*

# Ian Webster

## Objective

To leverage my expertise in AI systems, full-stack architecture, and XR/UX development to create cutting-edge digital experiences that bridge advanced technology and user-centered design.

## Summary

Innovative Full Stack and XR Developer with hands-on experience building AI-driven platforms, scalable cloud infrastructures, and immersive VR applications. Skilled in modern web technologies (React, TypeScript, FastAPI) and real-time 3D development (Unreal Engine 5, Unity). Proven ability to architect performant systems, optimize user experience, and deliver production-ready solutions across web, backend, and immersive environments.

## Experience

### TIMIO News - Full Stack Developer

9/2025 - Current

- Architected an AI-powered research platform using Google Gemini API and LangChain to generate comprehensive reports on current topics
- Built scalable AWS backend infrastructure to Python FastAPI and Boto3, integrating S3 for distributed article storage
- Implemented sophisticated multi-method deduplication and fact checking with sources to ensure data quality across hundreds of generated articles
- Delivered high-performance React frontend with TypeScript and Radix UI component library, reducing initial loading from 5+ seconds to <500ms

### Green Lounge TV - Software Developer

11/2024 - 7/2025

- Developing an immersive VR service bay experience for Toyota (Unreal Engine 5), focusing on 3D UX interactivity, physics, and Meta Quest optimization
- Engineering controller-based interactions and real-time rendering pipelines (C++), ensuring high-fidelity visuals and performance
- Deployed builds to standalone Quest headsets and PCs, showcasing the project at NADA 2025

### SMU Radio Frequency - Full Stack Web Developer

10/2024 - 2/2025

- Spearheaded website redesign (React/Node.js), enhancing UI/UX navigation flow
- Integrated real-time features including live audio streaming and chat, collaborating with radio staff for seamless broadcasting utilizing Mixlr and Spotify API (JavaScript)
- Improved web traffic by conducting A/B testing and user feedback sessions to refine design
